

Veterans Museum & Education Center Inc.

A Tribute to American Patriots - Our Veterans

March 1,2016

Dear Citizens of Volusia County

I would like to share some information about a very special project in our community that our citizens should be aware of.

A non profit organization, the Veterans Museum & Education Center Inc., is in the process of establishing a Veterans Museum in the Daytona Beach area.It is a tribute to American Patriots,our veterans,especially Volusia County veterans.

The museum will be dedicated to honor the commitment,dedication,service,and sacrifice of the men and women who have served in the United States Armed Forces to defend our freedom and liberty.

A small museum was previously located in the Ormond Beach City Hall building.A larger location will not only provide a place to properly honor our veterans but will allow us to improve the education of the younger generations about the cost of freedom and will be a place to encourage and foster pride and patriotism in our country.The larger venue will send a message to all our citizens and visitors,that our community really cares about and values our veterans.

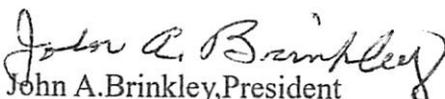

The new and expanded museum will be located at 166 South Beach St.,Daytona Beach, Fl 32114 and is planned to open the first phase in late May to early June 2016.The museum space is being made possible by Dr. Wahba,a well known physician in the area.

The museum will include a feature to spotlight a veteran each month. Any one who has served in the military is qualified as a candidate for the Veteran of the Month.

We must remember that freedom is not free,it requires sacrifice.To remember our veterans is to honor them.

We need your help and support to make the museum a success and hope we can depend on you to join us in accomplishing this task through both artifacts donations and financial donations.All donations are tax deductible and a plaque will be posted with your name or business for donors to the museum.

Respectfully,

John A.Brinkley,President

Veterans Museum & Education Center Inc.
